

## **Terra Andina Backgrounder**

Headquartered in Santiago, Chile, Terra Andina is a leading producer of innovative premium wines. With its name meaning “Land of the Andes,” Terra Andina’s award-winning wines express the diversity of Chile’s renowned terroirs, with vineyards spanning the length of this proud Andean nation, including the prized Maipo, Rapel, Casablanca and Colchagua Valleys, as well as cutting edge regions like the Limari and Leyda Valleys.

Led by the visionary winemaker Stefano Gandolini, whose winemaking experience spans three continents, Terra Andina is redefining Chilean wine by combining New World fruit-forward voluptuousness with Old World balance and finesse. Terra Andina is committed to individual varietal expression and sources the best grapes from the best growing regions. Differences in soil types, climate and ripening times are all taken into account to preserve each varietal’s unique flavor and bouquet. Terra Andina’s innovative signature style is fruit forward, yet balanced and their affordable pricing makes these modern wines accessible for everyday enjoyment.

Terra Andina offers three distinct lines of wine, including Terra Andina Varietals, Terra Andina Reserva and Terra Andina Altos, a range of unique blends. They include Chile’s indigenous varietal, Carmenère, as well as Cabernet Sauvignon, Merlot, Pinot Noir, Cabernet-Franc, Syrah, Malbec, Chardonnay, and Sauvignon Blanc. Terra Andina is the first Chilean producer who pioneered the Carmenère-Carignan blend.

Terra Andina, with the backing of the Claro Group, one of Chile’s leading wine companies, continues to invest in state-of-the-art technology and equipment which enables them to consistently craft wines of high quality while satisfying their growing consumer demand. While part of the larger group, Terra Andina enjoys total creative independence and is small enough to be innovative, experimental and quality-centric.

Terra Andina’s passion for its wine begins in the vineyards and extends throughout the vitification, vinification and distribution process. Its modern and friendly wines are prized across the Americas, Western and Eastern Europe, as well as in Asia.
